Lima, Peru | Open to International Remote Roles (USA / LatAm / EU) | EST / CST / PST / CET overlap | Available as independent contractor — no visa sponsorship required

PROFESSIONAL PROFILE

Software Engineering graduate and Backend Developer with hands-on experience building REST APIs, automation workflows, and web interfaces. Specialized in Python, FastAPI, SQLAlchemy, Microsoft SQL Server, JWT, Pytest and Docker, with a strong focus on maintainability, technical documentation, testing and backend performance optimization. Builds side projects to explore modern architecture patterns (Clean Architecture, DDD, async Python) beyond day-to-day work.

PROFESSIONAL EXPERIENCE

White Lion Technology | Lima, Peru

Software Engineer — *Oct 2025 – Present*

- Delivered 20+ REST API endpoints with Python, FastAPI and SQLAlchemy, implementing business logic, validations, error handling and technical documentation for backend services.
- Improved critical query response times by **40%** by optimizing SQLAlchemy data access patterns on Microsoft SQL Server and reviewing backend data flows.
- Strengthened API security by implementing JWT authentication and authorization with endpoint-level and resource-level access control.
- Increased backend reliability to **97% test coverage** by building unit and integration test suites with Pytest and automated validation workflows.
- Improved maintainability by applying layered architecture, dependency injection, Docker Desktop containerization and documentation of technical decisions.

Flip | Lima, Peru

Process Automation Intern — *Jan 2025 – Oct 2025*

- Reduced investor movement reporting execution time by **70%** by automating financial reporting workflows with Python, PyAutoGUI and Pandas.
- Reduced manual reporting errors and improved delivery accuracy by building simple Tkinter interfaces and reusable data processing workflows.

Promitia | Lima, Peru

Junior Frontend Developer — *Mar 2023 – Nov 2023*

- Built and maintained ~3 responsive web pages with HTML, CSS, JavaScript and Tailwind CSS, improving usability, visual consistency and device adaptability.
- Implemented frontend features with React, Next.js and Angular using component-based architecture to improve maintainability, reuse and UI scalability.

SELECTED PROJECTS

GenAIrator — *Capstone thesis project (TP202520041)*

- AI-powered fullstack code generation platform: analyzes Design System tokens and functional requirements to generate production-ready apps (Angular 20 + ASP.NET Core .NET 9) via GPT-5 orchestration.
- Automated quality gates (SonarQube, Lighthouse, WAVE/axe, WCAG 2.1) and JWT/OAuth2 security; deployed on AWS (S3/CDN, private VPC, RDS PostgreSQL) with GitHub Actions CI/CD.
- Validated end-to-end with **44/44** software test cases passed.

VeriLedger API — *Personal backend project*

- Verifiable finance backend exploring ledger integrity: transaction hashing, Merkle proofs, audit logs and idempotency over a REST/RPC-style API.
- Built with async FastAPI, SQLAlchemy 2.x + asyncpg, PostgreSQL, async Alembic and Pydantic v2, following Clean Architecture / DDD; tooled with uv, Ruff, Mypy, structlog and Docker Compose.

TECHNICAL SKILLS

Backend: Python, FastAPI, SQLAlchemy, Pydantic, REST APIs, JWT, Pytest, authentication, authorization, validation, error handling.

Databases: Microsoft SQL Server, PostgreSQL, MongoDB, data modeling, query optimization.

Frontend: JavaScript, React, Next.js, Angular, HTML, CSS, Tailwind CSS, responsive design, reusable components.

Tools & Practices: Docker, Docker Compose, Git, GitHub, GitHub Actions, API documentation, unit/integration testing, layered architecture, dependency injection, Clean Architecture, DDD.

Problem Solving: Codewars 7 kyu, 40+ completed katas.

SOFT SKILLS

Analytical thinking, fast learning, technical communication, attention to detail, problem solving, teamwork and continuous improvement mindset.

EDUCATION

Universidad Peruana de Ciencias Aplicadas (UPC) — Lima, Peru

B.S. in Software Engineering | Top 10% of class | Aug 2021 – Aug 2026

Coderhouse — *Lima, Peru | Full Stack Developer Program | Jul 2023 – Nov 2023*
